Assignment 10

1 -

- Sign up for a Streamlit account (if you don't have one).
- Sign up for a GitHub account (if you don't have one).
- Install Git on your computer (if you don't have one).

Get the BigMac Kiosk code that was demonstrated during the class. Push the code to your repository. Configure Streamlit Cloud so that your BigMac Kiosk app can be served to the public.

Make sure your name and student ID are shown at the top of the web app you created with Streamlit.

Once everything is done, include the web address of your BigMac Kiosk app in the file named `site.txt`. For example,

```
http://***.streamlit.app
```

where `***` could be any name you choose.

Note that all the steps you are asked to do in the above will also be required for the final project. So, think of this as an exercise, yet this is *not* an optional assignment. This is a graded assignment.
